Continuation Sheet (PTOL-303) 10/072,455

Continuation of 5. does NOT place the application in condition for allowance because: the argument is not persuasive and further the arguments presented in the "request for reconsideration" filed on 09/17/04 was not presented before the final rejection and was only discussed (some part of the argument) during the personal interview held on 08/03/04 which was also after the final rejection. Further, the examiner still believes that since both Cobb and Kameyama are related to polarizers and Kameyama (primary reference) discloses the use of linear polarizers as needed and Cobb discloses the advantage of using diffusive adhesive layers with linear polarizers (even though it is a multiple layer linear polarizer), one of ordinary skill in the art would be motivated to combine. It is also respectfully pointed out to applicant that the use of either a single layer linear polarizer or a multiple layers linear polarizer is widely known in the art.
